Did you know? Lovely, summerlike days that occur around October 18 are called Saint Luke's Little Summer in honor of the saint's feast day. Around this time, Saint Luke's feast day, there is a period brief period of calm, dry weather. Some folks call this Indian Summer, but that officially occurs between November 11 and November 20.

LL U LL R R 11

As we move through the month October, the risk of crop-killing frosts and hard freezes will quickly increase. The National Weather Service office in La Crosse, WI, compiled the following list of meteorological conditions that can lead to frost conditions:

- atmosphere.
- atmosphere as fog, frost, etc.) frost could develop on exposed surfaces.
- for frost.

Other local effects, such as soil moisture and temperature, and stage of vegetation "greenness", are factors that can affect the possibility of frost forming. The Midwest Regional Climate Center has put together a map of when Kentucky can typically expect to see the first 32 degree freeze of the season. The great majority of the commonwealth will see the first hard freeze during the last 10 days of October, but this can vary a week or two sooner or later depending on the set-up for that particular year.

Pumpkin Apple Muffins

1¼ cups all-purpose flour

1/2 teaspoon ground ginger 1/2 teaspoon ground nutmeg 1¼ cups honey 2 large eggs

11/2 cups fresh pureed pumpkin 1/2 cup canola oil 2 cups Granny Smith apples, finely chopped

Preheat oven to 325 degrees F. In a large bowl, combine flours, baking soda, salt and spices. In a small bowl, combine honey, eggs, pumpkin and oil; stir into dry ingredients just until moistened. Fold in apples. Fill greased or paper lined muffin cups, two-thirds full. Bake for 25 to 30 minutes or until muffins test done. Cool for 10 minutes before removing from pan.

Note: Can substitute two cups granulated sugar for honey, decrease baking soda by 1/4 teaspoon and increase oven temperature to 350 degrees F.

Yield: 18 muffins

Nutritional Analysis: 200 calories, 7 g fat, 0.5 g saturated fat, 35 mg cholesterol, 160 mg sodium, 35 g carbohydrate, 2 g fiber, 20 g sugar, 3 g protein

Buying Kentucky Proud is easy. Look for the label at your grocery store, farmers' market, or roadside stand.

Fall Frost and Freeze Information for The Bluegrass State By Derrick Snyder - National Weather Service Paducah, KY

• Clear skies lead to radiational cooling, allowing the greatest amount of heat to exit into the

• Calm to light winds prevent stirring of the atmosphere, which allows a thin layer of super-cooled temperatures to develop at the surface. These super-cooled temperatures can be up to 10 degrees cooler than five to six feet above the surface, where observations are typically taken. This is why frost develops even when reported temperatures are a few degrees above freezing. • Cool temperatures, with some moisture, that promote ice crystal development. If the

supercooled, freezing temperatures can cool to the dew point (the temperature at which, when cooled to at constant pressure, condensation occurs; moisture will have to come out of the

 Local topography also has a large role in determining if and where frost develops. Cold air will settle in the valleys since cold air is heavier than warm air, therefore frost conditions are more prone in these regions. Valleys are also sheltered from stronger winds, enhancing the potential

2024 Fall Crop Protection Webinar Series scheduled for October and November

Sign up now for a popular webinar series that addresses timely topics regarding integrated pest management for field crops. University of Kentucky Martin-Gatton College of Agriculture, Food and Environment extension specialists have once again organized the Fall Crop Protection Webinar Series, hosted through the Southern Integrated Pest Management Center. Each webinar will begin at 10 a.m. ET/9 a.m. CT, and will be one hour in length. Continuing education credits for Certified Crop Advisors and Kentucky pesticide applicators will be available.

This year the webinars will be held Oct. 15, Oct. 29, Nov. 12, and Nov. 26. Pre-registration is required to attend each webinar. The webinars are open to agriculture and natural resource county extension agents, crop consultants, farmers, industry professionals, and others, whether they reside or work in Kentucky or outside the state. Pre-registration links and schedules follow:
